

DISEASE

{ A change that disturbs the normal
{ functioning of the body's systems

DISEASE CAUSING PATHOGENS P. 151

Infectious vs. Noninfectious

& Infectious = contagious (can be easily spread in many ways; caused by pathogens)

∅ Antibiotics are used to treat bacterial infections

∅ Vaccines are used to prevent viral infections

& Noninfectious = not contagious (not caused by pathogens; caused by genetics, environment, or lifestyle)

B

Measles
