

Sedimentary Rock Brochure

Directions:

Complete the following steps to create a *colorful* and *information-packed* brochure about sedimentary rocks. Use the **Sedimentary Rocks PPT** posted to the Eagle's website under the Science tab.

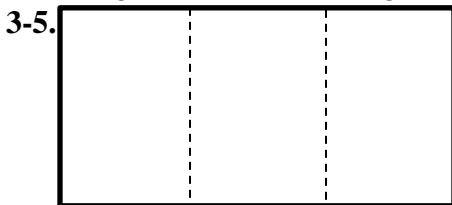

1. Take a piece of white printer paper and fold it into thirds.
2. On the **front flap**, give your brochure:
 - a catchy title (should reflect what the brochure is about)
 - a summary of how sedimentary rocks are formed
 - a picture that illustrates the process of sedimentation
3. On the **inside front flap (far left)**, include the following about **CLASTIC** sedimentary rocks
 - title
 - description
 - picture
 - example
4. On the **inside middle flap**, include the following about **CHEMICAL** sedimentary rocks
 - title
 - description
 - picture
 - example
5. On the **inside back flap (far right)**, include the following about **BIOCHEMICAL** sedimentary rocks
 - title
 - description
 - picture
 - example
6. On the **back of the brochure**, make one flap about **MECHANICAL WEATHERING**. This should include
 - an explanation of mechanical weathering
 - a list of types of mechanical weathering
 - descriptions of the types of mechanical weathering
 - pictures that will help to illustrate the different types
7. On the **back of the brochure**, make one flap about **CHEMICAL WEATHERING**. This should include
 - an explanation of chemical weathering
 - a list of types of chemical weathering
 - descriptions of the types of chemical weathering
 - pictures that will help to illustrate the different types
